➔ Learn more about this recall

Description: American Honda Motor Co., Inc. (Honda) is recalling certain 2022-2025 model year Civic vehicles. Due to an improperly produced steering gearbox worm wheel, the wheel can swell during use, reducing the grease film thickness between the worm wheel and worm gear. In addition, the worm gear spring preload was set improperly high, increasing the sliding force between the components. As a result of the reduced grease film thickness and increased sliding force, friction between the worm wheel and worm gear increases.

Increased friction between the worm gear and worm wheel can increase steering effort and difficulty, increasing the risk of a crash or injury.

Remedy: Registered owners of all affected vehicles will be contacted by mail and asked to take their vehicle to an authorized Honda dealer. The dealer will replace the worm gear spring with an improved part and redistribute or add grease. Owners who have paid to have these repairs completed at their own expense may be eligible for reimbursement, in accord with the recall reimbursement plan on file with NHTSA. For additional questions, owners may contact American Honda's Customer Support & Campaign Center at 1-888-234-2138.
